DETAILED ACTION

1. This Office action contains new grounds of rejection under 35 U.S.C. 101 not necessitated by the applicant's amendment and is therefore a non-final Office action.

Claim Rejections - 35 USC § 112

2. The rejection of claims 1-108 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention in the Office action mailed 22 November 2006 is withdrawn in view of the amendment filed 23 February 2007.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 21-49, 51-85, and 87-108 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 21-49, 51-85, and 87-108 are drawn to a process. A statutory process must include a step of a physical transformation, or produce a useful, concrete, and tangible result (State Street Bank & Trust Co. v. Signature Financial Group Inc. CAFC 47 USPQ2d 1596 (1998), AT&T Corp. v. Excel Communications Inc. (CAFC 50 USPQ2d 1447 (1999))). The instant claims do not result in a physical transformation, thus the Examiner must determine if the instant claims include a useful, concrete, and tangible result.

As noted in State Street Bank & Trust Co. v. Signature Financial Group Inc. CAFC 47 USPQ2d 1596 (1998) below, the statutory category of the claimed subject matter is not relevant

Art Unit: 1631

to a determination of whether the claimed subject matter produces a useful, concrete, and tangible result:

The question of whether a claim encompasses statutory subject matter should not focus on *which* of the four categories of subject matter a claim is directed to 9-- process, machine, manufacture, or composition of matter--but rather on the essential characteristics of the subject matter, in particular, its practical utility. Section 101 specifies that statutory subject matter must also satisfy the other "conditions and requirements" of Title 35, including novelty, nonobviousness, and adequacy of disclosure and notice. See *In re Warmerdam*, 33 F.3d 1354, 1359, 31 USPQ2d 1754, 1757-58 (Fed. Cir. 1994). For purpose of our analysis, as noted above, claim 1 is directed to a machine programmed with the Hub and Spoke software and admittedly produces a "useful, concrete, and tangible result." *Alappat*, 33 F.3d at 1544, 31 USPQ2d at 1557. This renders it statutory subject matter, even if the useful result is expressed in numbers, such as price, profit, percentage, cost, or loss.

In determining if the claimed subject matter produces a useful, concrete, and tangible result, the Examiner must determine each standard individually. For a claim to be "useful," the claim must produce a result that is specific, and substantial. For a claim to be "concrete," the process must have a result that is reproducible. For a claim to be "tangible," the process must produce a real world result. Furthermore, the claim must be limited only to statutory embodiments.

Claims 21-49, 51-85, and 87-108 do not produce a tangible result. A tangible result requires that the claim must set forth a practical application to produce a real-world result. Neither the method of independent claim 21, nor the apparatus of independent claims 37 and 57, nor the programs on media of independent claims 73 and 93 require that a result of the method is outputted to a user. Rather, the method of claim 21 requires that user instructions are generated, but not outputted to a user or stored or displayed in a user accessible fashion as suggested below. The apparatus of claim 37 does not have a limitation that the means for display in fact does

Art Unit: 1631

display a result. The apparatus of claim 57 does not have a limitation that the means for generating user instructions in fact does display the instructions or store the instructions in a user accessible fashion as suggested below. The program of claim 73 does not have a limitation that the result must be displayed or stored in a user accessible fashion as suggested below. The program of claim 93 does not have a limitation that the user instructions must be generated or stored in a user accessible fashion as suggested below. This rejection could be overcome by amendment of the claims to recite that a result of the method is outputted to a display or a memory or another computer on a network, or to a user, or by including a physical transformation.

Allowable Subject Matter

4. Claims 1-13 and 15-20 are allowable.
